

Expert lab in biodegradability

Expert lab in biodegradability Environment sector

Valuing the organic waste into new resources is a societal and economic challenge. Energetic valorization helps preserve natural resources and reduce the amount of waste stored. Also, **quickly evaluating** the waste energetic's potential is essential for the circular economy's actors for the catchment and the production of matter and energies from these deposits.

Our **expert lab** works for the characterization and valorization of your organic waste.

Good to know :

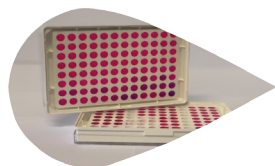

Scanae, its also an engineering office, for technical studies and Research and development for its clients, through consultancy, training, R&D and innovations.

Our analytical offer :

SCREENING

FluoMethane®

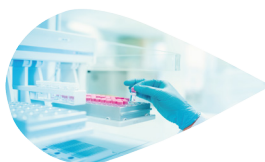

Fast determination of the methane potential

COMPLEMENTARY ANALYSIS

Physicochemical analysis
Matter analysis
Bacterial toxicity tests
Digestate analysis

Contact us

Scanae is certified by the French Ministry of Research, allowing our clients to profit the research tax credit.
(available for french offices).

Scanae is certified by the French Ministry of Agriculture for the importation and the analysis of animals co-products samples from foreign countries.

We thank for their trust :
